

Breathing Made Simple

SPARE AIR Xtreme Sport - 170PKX

Provides as many as 32 surface breaths for a variety of extreme sport emergencies.

Ideal for Extreme Watersports:

Tow-in Surfing

Kayaking

River Rafting

Over the years, kayakers, surfers and other water-sportsmen have been using the Spare Air as a rescue safety device. Their only complaint - they needed a small breathing device that was "hands-free." The Xtreme sport solves this by reducing the size of the air tank and mounting the unit in a chest pocket on a neoprene vest. Now your next breath is only inches away.

SPARE AIR Xtreme 6 - 600PKX

Up to 20 minutes of air in a compact mini SCUBA system combined with the innovative Snorkelator.

Mini SCUBA ideal for:

Snorkeling

Shallow Reef Diving

Boat Maintenance

Introducing the SPARE AIR Xtreme 6 for SCUBA divers who would like a lighter, easier set-up while snorkeling, performing quick boat maintenance or hunting for scallops & lobsters.

Xtreme 6 is a complete mini dive and snorkel system. Comes fully assembled, ready to strap on to your waist and jump in the water. The Second Stage Regulator combined with the innovative Snorkelator allows the user to quickly switch from Snorkel to Regulator and back again - conserving air. Simple, light-weight setup is just under 5 lbs.

Product Specifications:

Part Number	600PKX	170PKX
